About This Collection

We need to write a short enticing description 60-90 words, in same language as title: Chinese (since title is Chinese). Use "to" instead of "in order to". Must include them naturally. Must not use forbidden words. Avoid em/en dashes. So end with something like "请点击上方链接查看完整图集". Must end with natural invitation to view full gallery via link above. We'll aim for ~70 words (including those tokens). Must be in Chinese language. No "At its core". Use commas. Use "because". Those words are in various languages (Russian, English, Spanish). No forced groups of three. Avoid AI-flag words. Must reuse at least 20% of key words from captions, and must include exact words: производства, 2021, жанр, язык, китайски, quot, cherie, deville, toma, sofá, sala, sexy, chinese, chick, hesitant. Must be plain text. Must not use markdown, no bold, etc. Must be 60-90 words. " So we must embed those exact tokens in the Chinese paragraph. No generic positive endings. Word count maybe count tokens separated by spaces. But we write Chinese, but include those words. No inflated importance. Probably English words count? but". But we need to include those exact words (they are not Chinese). Count words? No clichés. That seems odd but required. End on concrete fact or plain natural invitation.

We need to incorporate the required words. The captions have many Chinese words: 程女士, 1v3, 麻豆, 传媒, 电影, etc. They are not Chinese, but we can embed them in the Chinese text. But we need at least 20% of key words from captions. Eg: "制作 年份 2021， жанр All Sex， 语言 китайски， quot cherie deville toma sofá sala sexy chinese chick hesitant". But must be natural. But we just need to reuse at least 20% of key words. Probably okay if we include some like "程女士", "1v3", "麻豆", "传媒", "2021", "制作", "语言", "中文". But also must include the exact required words.

We must keep word count 60-90 words. That would be weird. Count words separated by spaces. " Title is Chinese, so description must be Chinese. Probably they count words separated by spaces. But that may be considered unnatural. However the instruction about word count likely expects English words. Could embed spaces between Chinese tokens. Chinese doesn't have spaces. But they explicitly say same language as title (Chinese). But word count may be ambiguous. But we can produce Chinese with spaces between words (like each Chinese word separated by space). But safer: produce description in Chinese but with spaces between each Chinese token? But we can separate with spaces for counting. Chinese words not separated by spaces typically. Better to write in English? Hmm.

We could produce a Chinese paragraph but include the required English words. The word count may be counted as tokens separated by spaces (including Chinese tokens if spaced). Could produce about 70 tokens.

We need to avoid forbidden words: delve, tapestry, vibrant, testament, landscape, showcase, crucial, pivotal, additionally, moreover, furthermore, "it is important to note", "serves as", "boasts". No emojis, no curly quotes, no markdown, no bold. Use "because". Also no em/en dashes. No forced groups of exactly three items. Use "to" instead of "in order to". No "At its core". No inflated importance, no sales language, no clichés like "nestled", "breathtaking", "unforgettable". No generic positive endings; end on concrete fact or plain natural invitation. No "not only X but Y". Use commas. Vary sentence length naturally, state things directly, keep claims supported by captions.

We must include required words exactly: "производства", "2021", "жанр", "язык", "китайски", "quot", "cherie", "deville", "toma", "sofá", "sala", "sexy", "chinese", "chick", "hesitant". Probably exactly as given. These are case-sensitive? We'll include them exactly.

We need to produce 60-90 words. Let's count approximate words if we separate by spaces. We'll produce maybe 70 words.

We'll write something like:

"程女士 1v3 视频 展示 制作 年份 2021 жанр All Sex 语言 китайски quot cherie deville toma sofá sala sexy chinese chick hesitant 场景 在 沙发 上 与 三位 男性 互动 画面 高清 无水印 请 点击 上方 链接 查看 完整 图集"

Now count words (space-separated tokens). Let's count:

程女士 (1)

1v3 (2)
