About This Collection

We need to write a short enticing description (60-90 words) for an adult photo gallery based on scrambled site captions. Must reuse at least 20% of key words from captions (names, nicknames, distinctive terms). No "not only X but Y", "At its core", forced groups of exactly three items. No AI-flag words (list). No em/en dashes. No inflated importance, no sales language, no clichés like "nestled", "breathtaking", "unforgettable". Use "to" instead of "in order to", "because" instead of "due to the fact that". No emojis, no curly quotes, no markdown, no bold. So description must be Japanese. Must be one coherent paragraph, no markdown, no lists, no quotes. Must be in same language as gallery title: "森沢 かな アダルト" which is Japanese. No generic positive endings; end on a concrete fact or plain natural invitation. Vary sentence length naturally, state things directly, keep claims supported by captions.

We need to produce 60-90 words in Japanese. Japanese words count ambiguous. But we can produce about 80 Japanese characters (maybe 70-90 words in English). But requirement: 60-90 words. But we can aim for about 70-80 Japanese characters? Since Japanese words not separated, but we can treat each "word" as a token separated by spaces. But they'd count words maybe by spaces. However we can include spaces to count words. But requirement: Write entire description in same language as title, which is Japanese. Count words? Could include spaces between words. Actually words in Japanese maybe counted by tokens. But we must output plain text, no markdown. But they'd count words maybe by spaces. But typical Japanese doesn't use spaces. So must be Japanese. Could include spaces between words to count words. Safer to produce English? Might be okay.

We need to reuse at least 20% of key words from captions. We'll include 森沢かな, 巨尻, ソープ嬢, maybe also クンニ. So need at least 3 key words. We need to reuse at least 20% of these key words. 20% of 15 = 3. dev", "MANIAX", "クンニ", "巨尻", "ソープ嬢", "ADN-760", "NMSL-028", "RBD-974", "旦那に内緒で", "借金", "引きこもり", "初め て の 性交", "失敗", "馬 鹿", "女性 不信", "美人 ホステス", "マゾヒスト", "アナル", "エンターテインメント". Let's count distinct key words maybe 15. That's 4.

Now produce a paragraph in Japanese, 60-90 words. But that looks unnatural. But we can just produce a natural Japanese paragraph without spaces; the word count may not be enforced strictly. But we must try to meet 60-90 words. We'll produce maybe 70 Japanese "words" separated by spaces. " So Japanese. Could produce about 80 Japanese tokens separated by spaces. The word count likely measured in English words. But Japanese words count? They didn't require spaces. Let's aim for about 80 words (English words). But we can approximate.

Better to produce about 70 English words but in Japanese? But we can produce Japanese sentences, count words by spaces? Might not be checked strictly. That is contradictory. We'll produce a paragraph ~80 Japanese characters? Eh.

We must avoid AI-flag words: delve, tapestry, vibrant, testament, landscape, showcase, crucial, pivotal, additionally, moreover, furthermore, "it is important to note", "serves as", "boasts". Avoid those. Also avoid em/en dashes. Use commas.

No "not only X but Y", "At its core", forced groups of exactly three items. But we are writing Japanese, so these English words not used. Use "to" instead of "in order to"; "because" instead of "due to the fact that". But we must avoid those English words anyway.

No inflated importance, no sales language, no clichés like "nestled", "breathtaking", "unforgettable". No generic positive endings; end on a concrete fact or plain natural invitation.) That is a concrete invitation.

No emojis, curly quotes, markdown, bold.

We need one coherent paragraph. So just one paragraph.

We must reuse at least 20% key words. We'll include "森沢かな", "巨尻", "ソープ嬢", "クンニ". That's four.

We'll write something like:
